Custom ZMK Layout
Key Function Manual

ZMK FIRMWARE

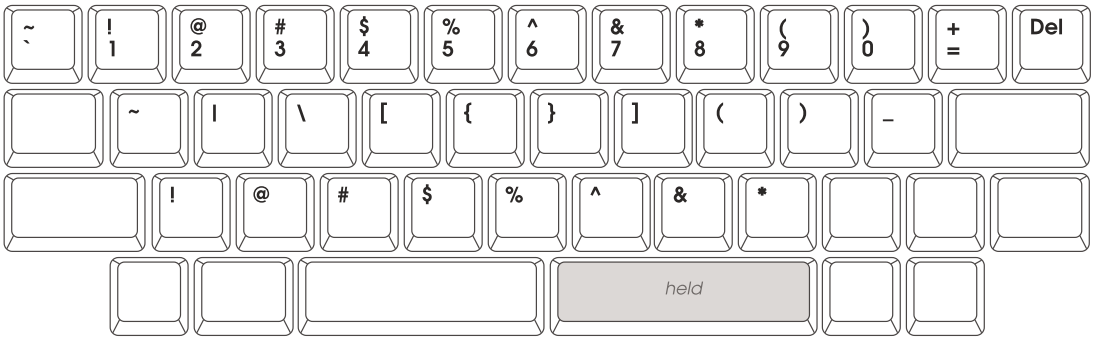

Quick tip: a **grey tag** is what the key does when held. **1×** marks a sticky key: tap it, then the next key. Blank keys pass through to Layer 0.

Layer 0 BASE

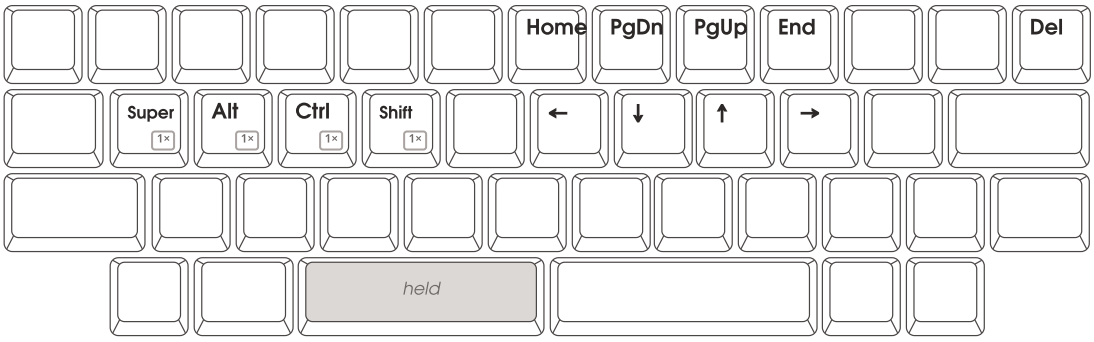

- è — **Hold for the accent** à è ì ò ù, and é on '
- 1× — **Sticky:** tap, then the next key
- NUM — **Hold for Layer 1**, right Space
- NAV — **Hold for Layer 2**, left Space
- **Both Spaces** for Layer 3
- ' — **Plain apostrophe**; Shift gives "
- Super — **Plain key**, hold it

Layer 1 NUM

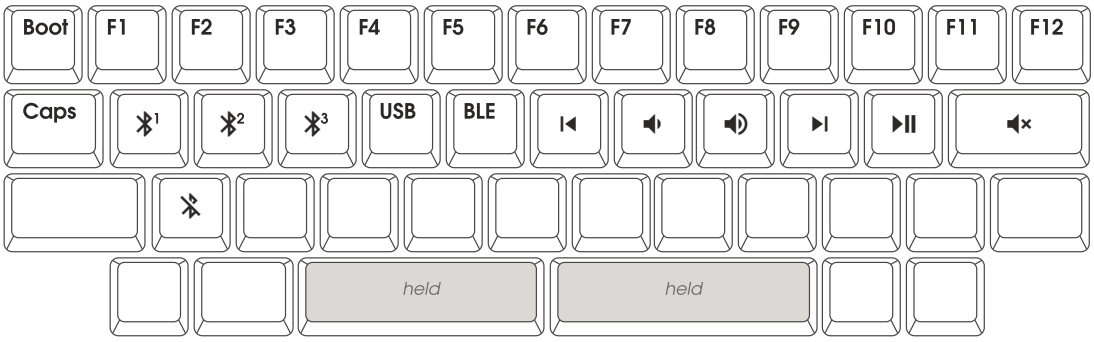

- **Hold right Space**
- 1–0 — **Super + number** switches mango workspace
- . / - — **Pass through** for `~/`, `1.5`, IPs
- ` ~ ^ — **Plain characters**, not dead keys

Layer 2 NAV

- **Hold left Space**
- ← ↓ ↑ → — **Arrows on hjkl**
- 1× — **Sticky modifiers:** tap `D`, tap `L` = Ctrl+→
- Home — **Home, PgDn, PgUp, End** sit above the arrows

Layer 3 FN

- **Hold both Spaces**
- BT1 — **Select Bluetooth profile 1–3**
- **Clear pairing** of the current profile
- USB — **Switch output** to USB or BLE
- Boot — **Bootloader** for flashing
- **Media** previous, play/pause, next
- **Volume** down, up, mute

Everyday actions

ACTION	SENDS	KEYS
è à ì ò ù		hold the vowel
é		hold '
È		tap Shift, hold E
Capital letter		tap Shift, tap the letter
Apostrophe / quote	' / "	tap ' / tap Shift, tap '
Newline in Claude Code	Shift+Enter	tap Shift, tap Enter
Question / exclamation mark	? / !	tap Shift, tap / / hold R Space + Z
Number	1 … 0	hold R Space + Q … P
Backspace		right thumb, the key right of R Space
Copy / paste	Ctrl+C / Ctrl+V	tap Ctrl, tap C / V
Kitty copy / paste	Ctrl+Shift+C / V	tap Ctrl, tap Shift, tap C / V
Switch workspace	Super+3	hold Super + hold R Space + E
Move window to workspace	Super+Shift+3	tap Shift, then hold Super + hold R Space + E
Other mango shortcuts	Super+Return, Super+q	hold Super + the key
Focus direction	Super+Left	hold L Space, tap A, tap H
Kitty tab	Alt+3	tap Alt, hold R Space + E
Accept fish autosuggestion	Right	hold L Space + L

No mango config changes are needed: every action sends exactly what a full-size keyboard would.

Timing

KEY	FLAVOR	TERM	QUICK-TAP	PRIOR IDLE
Space / NAV	balanced	200	175	150
Space / NUM	balanced	200	175	—
Vowels and '	tap-preferred	250	—	—

STICKY KEYS	RELEASE AFTER	QUICK RELEASE
Shift, Ctrl, Alt, Super	1500	yes

- All values in milliseconds. Vowels are decided by time only: shorter than 250 ms types the letter, longer gives the accent; they type on release.
- Sticky keys apply to the next key only and expire after 1.5 s. Tapping Ctrl then Shift stacks them. They can also be held normally.
- Space / NUM has no prior-idle setting; otherwise typing `port 8080` quickly would give letters instead of digits.

Design

1. **Thumbs hold, nails tap one key at a time.** No pinkies, no ring-finger chords; ring fingers only reach Esc and Backspace.
2. **Long-press vowels** for Italian accents, like a phone keyboard.
3. **Sticky Shift, Ctrl and Alt:** tap, then the next key.
4. **' and " are always plain**, despite `us intl` dead keys.
5. **Super under the left thumb, Backspace under the right.**

Requires `us intl`

Accents and plain quotes are typed as `us intl` dead-key sequences: ` + vowel for è, ' + e for é, ' + Space for '. On a device with a plain US layout, accents come out as `e and quotes get an extra space.

Dropped from stock

Mouse keys (trackpad available), Win+V, Print Screen (mango uses Super+Shift+S), Insert, Pause, Scroll Lock, right Alt, arrow cluster (now on NAV).
