Agar mini

Custom ZMK Layout
Key Function Manual

ZMK FIRMWARE

Quick tip: a **grey tag** is what the key does when held. **1×** marks a sticky key: tap it, then the next key. Blank keys pass through to Layer 0.

Layer 0 BASE

è **Hold for the accent** à è ì ò ù, and é on '

1× **Sticky:** tap, then the next key

NUM **Hold for Layer 1**, right Space

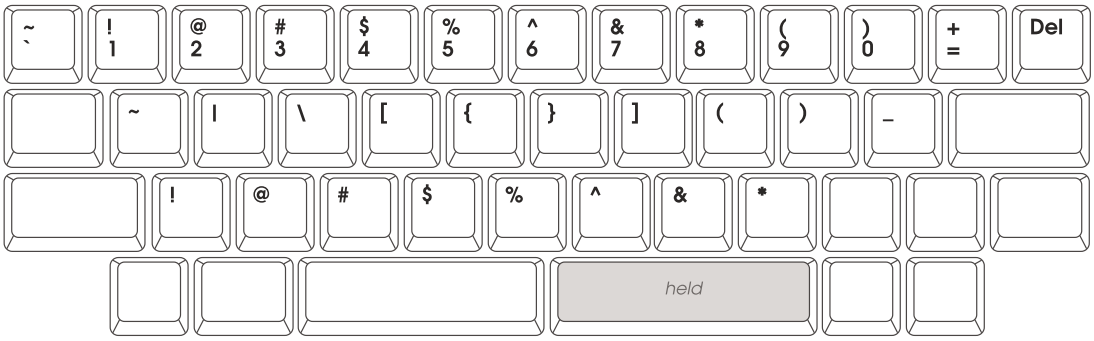

NAV **Hold for Layer 2**, left Space

Both Spaces for Layer 3

' **Plain apostrophe**; Shift gives "

Super **Plain key**, hold it

Layer 1 NUM

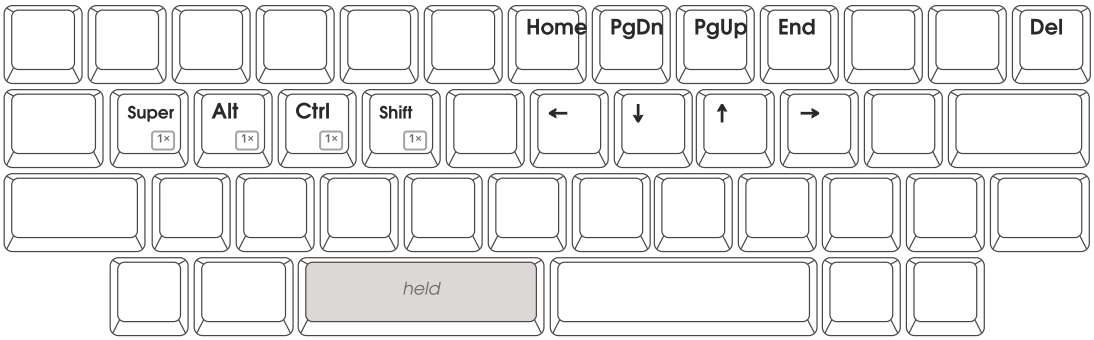

Hold right Space

1–0 **Super + number** switches mango workspace

. / - **Pass through** for `~/`, `1.5`, IPs

` ~ ^ **Plain characters**, not dead keys

Layer 2 NAV

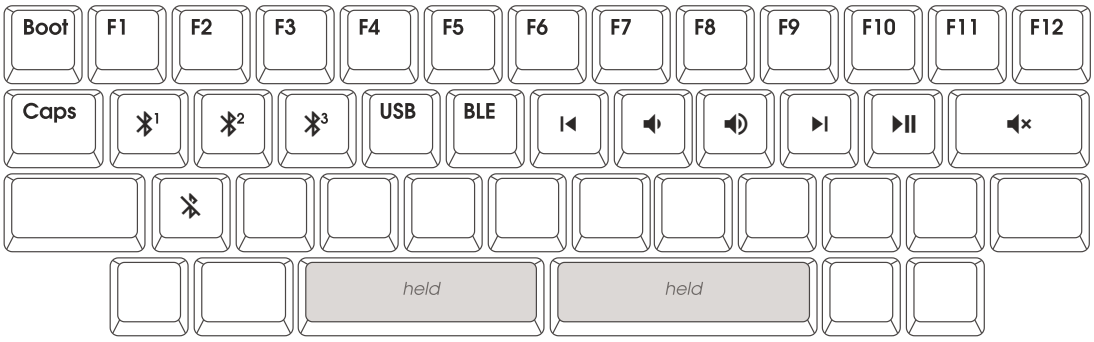

Hold left Space

← ↓ ↑ → **Arrows on hjkl**

1× **Sticky modifiers:** tap `D`, tap `L` = Ctrl+→

Home **Home, PgDn, PgUp, End** sit above the arrows

Layer 3 FN

Hold both Spaces

1 **Select Bluetooth profile 1–3**

Clear pairing of the current profile

USB **Switch output** to USB or BLE

Boot **Bootloader** for flashing

Media previous, play/pause, next

Volume down, up, mute

Everyday actions

ACTION	SENDS	KEYS
è à ì ò ù		hold the vowel
é		hold '
È		tap Shift, hold E
Capital letter		tap Shift (right thumb), tap the letter
Apostrophe / quote	`' / "`	tap ' / tap Shift, tap '
Newline in Claude Code	`Shift+Enter`	tap Shift, tap Enter
Question / exclamation mark	`? / !`	tap Shift, tap / / hold R Space + Z
Number	`1 … 0`	hold R Space + Q … P
Backspace		top-right corner, as on the Q4
Copy / paste	`Ctrl+C / Ctrl+V`	tap Ctrl, tap C / V
Kitty copy / paste	`Ctrl+Shift+C / V`	tap Ctrl, tap Shift, tap C / V
Switch workspace	`Super+3`	hold Super + hold R Space + E
Move window to workspace	`Super+Shift+3`	tap Shift, then hold Super + hold R Space + E
Other mango shortcuts	`Super+Return, Super+q`	hold Super + the key
Focus direction	`Super+Left`	hold L Space, tap A, tap H
Kitty tab	`Alt+3`	tap Alt, hold R Space + E
Accept fish autosuggestion	`Right`	hold L Space + L

No mango config changes are needed: every action sends exactly what a full-size keyboard would.

Timing

KEY	FLAVOR	TERM	QUICK-TAP	PRIOR IDLE
Space / NAV	balanced	200	175	150
Space / NUM	balanced	200	175	—
Vowels and '	tap-preferred	250	—	—

STICKY KEYS	RELEASE AFTER	QUICK RELEASE
Shift, Ctrl, Alt, Super	1500	yes

- All values in milliseconds. Vowels are decided by time only: shorter than 250 ms types the letter, longer gives the accent; they type on release.
- Sticky keys apply to the next key only and expire after 1.5 s. Tapping Ctrl then Shift stacks them. They can also be held normally.
- Space / NUM has no prior-idle setting; otherwise typing `port 8080` quickly would give letters instead of digits.

Design

1. **Thumbs hold, nails tap one key at a time.** No pinkies, no ring-finger chords; ring fingers only reach Esc and Backspace.
2. **Long-press vowels** for Italian accents, like a phone keyboard.
3. **Sticky Shift, Ctrl and Alt:** tap, then the next key.
4. **' and " are always plain**, despite `us intl` dead keys.
5. **Super under the left thumb, a second Shift under the right.** Backspace stays top-right.

Requires `us intl`

Accents and plain quotes are typed as `us intl` dead-key sequences: ` + vowel for è, ' + e for é, ' + Space for '. On a device with a plain US layout, accents come out as `e and quotes get an extra space.

Dropped from stock

Mouse keys (trackpad available), Win+V, Print Screen (mango uses Super+Shift+S), Insert, Pause, Scroll Lock, right Alt, arrow cluster (now on NAV).
