Custom ZMK Layout
Key Function Manual

ZMK FIRMWARE

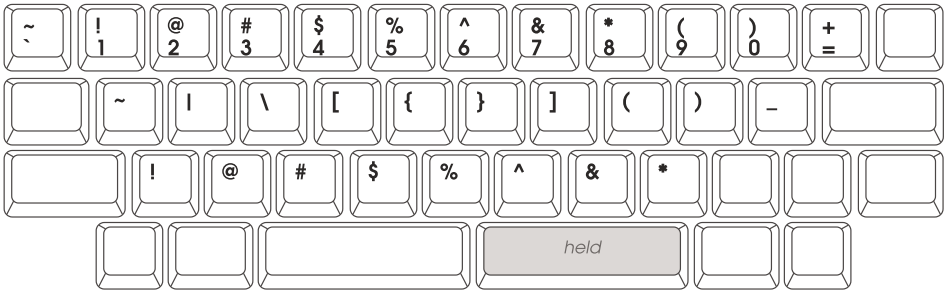

Quick tip: a **grey tag** is what the key does when held. **1×** marks a sticky key: tap it, then the next key. Blank keys pass through to Layer 0.

Layer 0 BASE

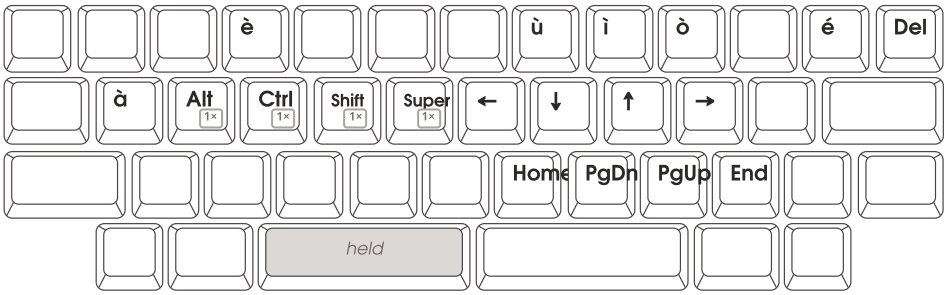

- 1× **Sticky:** tap, then the next key
- ' **Plain apostrophe**; Shift gives ". Accents are on Layer 2
- NUM **Hold for Layer 1**, right Space
- NAV **Hold for Layer 2**, left Space
- **Both Spaces** for Layer 3
- Super **Plain key**, hold it
- Shift **The only Shift**, bottom-left as usual
- ← → **Arrows:** with Super, switch window; → accepts fish's suggestion

Layer 1 NUM

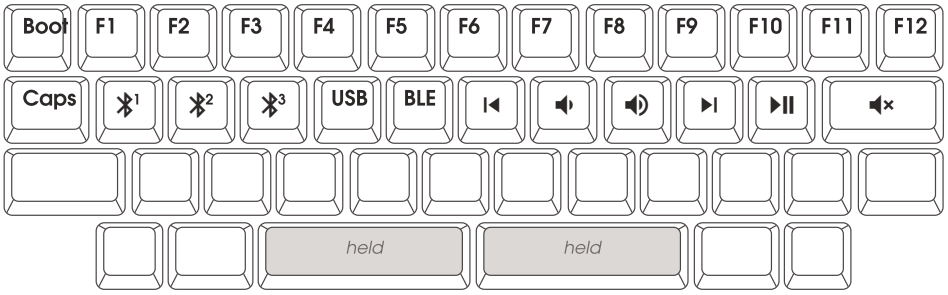

- **Hold right Space**
- 1–0 **Super + number** switches mango workspace
- . / - **Pass through** for `~/`, `1.5`, IPs
- Bksp **Backspace** works without releasing
- ` ~ ^ **Plain characters**, not dead keys

Layer 2 NAV

- **Hold left Space**
- è **Accents:** tap the vowel, ' for é; tap Shift before Space for the capital
- ← ↓ ↑ → **Arrows on hjkl**
- 1× **Sticky modifiers:** tap `D`, tap `L` = Ctrl+→
- Home **Home, PgDn, PgUp, End** sit below the arrows

Layer 3 FN

- **Hold both Spaces**
- BT1 **Bluetooth profile 1–3**; hold 3 s to clear its pairing
- USB **Switch output** to USB or BLE
- Boot **Bootloader:** hold 3 s; a tap restarts
- ⏮ ⏯ ⏭ **Media** previous, play/pause, next
- 🔉 🔊 🔇 **Volume** down, up, mute

Everyday actions

ACTION	SENDS	KEYS
è à ì ò ù		hold L Space + the vowel
é		hold L Space + '
È		tap Shift, then hold L Space + E
Backtick	`` ` ``	hold R Space + Esc
Capital letter		tap Shift (bottom left), tap the letter
Apostrophe / quote	`' / "`	tap ' / tap Shift, tap '
Newline in Claude Code	`Shift+Enter`	tap Shift, tap Enter
Question / exclamation mark	`? / !`	tap Shift, tap / / hold R Space + Z
Number	`1 … 0`	hold R Space + Q ... P
Backspace		top-right corner, as on the Q4
Run the last command again	`Up, Enter`	hold L Space + K, tap Enter
Copy / paste	`Ctrl+C / Ctrl+V`	tap Ctrl, tap C / V
Kitty copy / paste	`Ctrl+Shift+C / V`	tap Ctrl, tap Shift, tap C / V
Switch workspace	`Super+3`	hold Super + hold R Space + E
Move window to workspace	`Super+Shift+3`	tap Shift, then hold Super + hold R Space + E
Other mango shortcuts	`Super+Return, Super+q`	hold Super + the key
Focus left / right	`Super+Left / Right`	hold Super + ← / →
Focus up / down	`Super+Up`	hold L Space, tap G, tap K
Kitty tab	`Alt+3`	hold L Space, tap S (Alt), then hold R Space + E
Accept fish autosuggestion	`Right`	tap → (bottom right)

No mango config changes are needed: every action sends exactly what a full-size keyboard would.

Timing

KEY	FLAVOR	TERM	QUICK-TAP	PRIOR IDLE
Space / NAV	balanced	200	175	150
Space / NUM	balanced	200	175	—

STICKY KEYS	RELEASE AFTER	QUICK RELEASE
Shift, Ctrl, Alt, Super	1500	yes

- All values in milliseconds. Letters have no hold behaviour: they type on press.
- Sticky keys apply to the next key only and expire after 1.5 s. Tapping Ctrl then Shift stacks them. They can also be held normally.
- Space / NUM has no prior-idle setting; otherwise typing `port 8080` quickly would give letters instead of digits.

Design

1. **Thumbs hold, nails tap one key at a time.** No chords; ring fingers only reach Esc and Backspace, the pinky only Shift, with the back of the finger.
2. **Accents on the left Space:** hold it and tap the vowel = è, `'` = é. `'` alone types the apostrophe.
3. **Sticky Shift, Ctrl and Alt:** tap, then the next key.
4. **" ` ~ ^ are plain**, despite `us intl` dead keys.
5. **Shift where it always is,** bottom-left. Super under the left thumb, ← → under the right. Backspace stays top-right.

Requires `us intl`

Accents and plain quotes are typed as `us intl` dead-key sequences: `` ` `` + vowel for è, `'` + `e` for é, `'` + Space for `'`. On a device with a plain US layout, accents come out as `` `e `` and quotes get an extra space.

Dropped from stock

Mouse keys (trackpad available), Win+V, Print Screen (mango uses Super+Shift+S), Insert, Pause, Scroll Lock, right Alt, arrow cluster (← → kept bottom right, all four on NAV).
